Kindness at It's Greatest in The Times of Need

Due to the death of Georg Floyd, there have been riots and protest raging all across USA. This has led to grocery and convenience stores being raided and plundered - and a parent of a student studying in Sanford Middle School in Minneapolis, reached out to other parents - only to hear that they needed food and that children did not have any mode of transportation to commute to school. When the school heard about this, they requested 85 meal kits to be donated as part of a drive. However, on Sunday morning, there was an overflow of donations containing supplies and food. The school was really grateful and has said that all the extra food will be sent to food shelters !

Teen Cleans

Antonio Gwynn Jr., a high school senior, cleaned his hometown Buffalo, New York all by himself after seeing the damage done by protestors. Gwynn was at work for 10 hours since he started cleaning at 2 a.m. on Monday, this story spread fast and the community decided to reward Antonio. Matt Block decided to gift Gwynn his 2004 red Mustang convertible after seeing Gwynn ask for some car buying advice on Facebook. Medaille College in Buffalo also offered the 18-year-old a full scholarship.

The “UNITY” Mailbox

A father and son on Chester-land are using their mailbox with the word ‘UNITY’ written on it to spread messages of love, peace, kindness and togetherness. People are allowed to leave optimistic, uplifting messages that they want to share with society and pick another message from the mail box in return. The main goal of this initiative is to spread positivity, bring society together, to better ourselves and to remove our focus from social media for a while!

Teenage Inventor on a Mission

When 14-year-old Freddie realized how vulnerable his great-aunt was, he wanted to help. So he came up with two inventions that could make her life safer. Since Freddie did not want great aunt, Pat to pay for things she didn't need, he came up with a *Door Pi*. This would sense and only recognize members of the house, not strangers or others who were not supposed to enter. It came out to be a success so he entered it into the Big Ban Competition and won the prize of Best Junior Engineer. After this, he was determined to help his great aunt in another way. He knew that great aunt falls a lot and half the time she forgets to press her button so Freddie can't find her to pick her up. So he decided to make another invention, *Fallbot*. *Fallbot* is a wearable sensor that sends an alert when you fall, it then dispatches a robot to look for you.
